

I understand that the FCC is currently considering expanding low power FM signals in a way that would take priority over current FM translator service. I am writing to express my strong objections to this. The current translator set-up allows many important Christian radio services, such as Educational Media Foundation's K-LOVE and Air 1 networks, to reach many thousands of people including myself. Please do not change the rules in a manner that would in any way curtail or threaten these services. Thank you for your consideration.
